# Rajalakshmi Engineering College

Name: Tarrun B

Email: 241801291@rajalakshmi.edu.in

Roll no: 241801291 Phone: 9840381059

Branch: REC

Department: I AI & DS FD

Batch: 2028

Degree: B.E - AI & DS

## NeoColab\_REC\_CS23231\_DATA STRUCTURES

REC\_DS using C\_Week 2\_COD\_Question 1

Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1: Coding

#### 1. Problem Statement

Your task is to create a program to manage a playlist of items. Each item is represented as a character, and you need to implement the following operations on the playlist.

Here are the main functionalities of the program:

Insert Item: The program should allow users to add items to the front and end of the playlist. Items are represented as characters. Display Playlist: The program should display the playlist containing the items that were added.

To implement this program, a doubly linked list data structure should be used, where each node contains an item character.

**Input Format** 

The input consists of a sequence of space-separated characters, representing the items to be inserted into the doubly linked list.

The input is terminated by entering - (hyphen).

#### **Output Format**

The first line of output prints "Forward Playlist: " followed by the linked list after inserting the items at the end.

The second line prints "Backward Playlist: " followed by the linked list after inserting the items at the front.

Refer to the sample output for formatting specifications.

### Sample Test Case

Input: a b c -

```
Output: Forward Playlist: a b c
    Backward Playlist: c b a
    Answer
    #include <stdio.h>
    #include <stdlib.h>
    struct Node {
   char item;
      struct Node* next;
      struct Node* prev;
    }:
    // You are using GCC
    void insertAtEnd(struct Node** head, char item) {
      struct Node* newn=(struct Node*)malloc(sizeof(struct Node));
      newn->item=item:
      newn->next=NULL;
      newn->prev=NULL;
      if(*head==NULL){
       *head=newn;
else{
```

```
struct Node* temp=*head;
       while(temp->next!=NULL){
         temp=temp->next;^
       temp->next=newn;
       newn->prev=temp;
   void displayForward(struct Node* head) {
     struct Node* temp=head;
     while(temp){
        printf("%c ",temp->item);
        temp=temp->next;
                                                   241801291
     }//type your code here
   void displayBackward(struct Node* tail) {
      struct Node*temp=tail;
      while(temp->next){
        temp=temp->prev;
      while(temp){
        printf("%c ",temp->item);
        temp=temp->prev;
      printf("\n");
                                                   241801291
void freePlaylist(struct Node* head) {
    struct Node* temp=head;
    free(temp);
    //type your code here
   int main() {
      struct Node* playlist = NULL;
      char item;
     while (1) {
                                                   241801291
        scanf(" %c", &item);
      if (item == '-') {
          break;
```

241801291

```
insertAtEnd(&playlist, item);
                                                                              241801291
                                                    241801291
       struct Node* tail = playlist;
       while (tail->next != NULL) {
         tail = tail->next;
       printf("Forward Playlist: ");
       displayForward(playlist);
       printf("Backward Playlist: ");
       displayBackward(tail);
                                                                              241801291
                                                    241801291
freePlaylist(playlist);
       return 0;
    }
     Status: Correct
                                                                       Marks: 10/10
